

# HOMESCHOOL ADVICE

## Some tips for teaching your kids at home

### Keep in touch with teachers

Ask the teacher if you have to strictly follow the curriculum given, or if you have the freedom to adjust the schedule.

Teachers can also give you tips on how to effectively facilitate your kids' learning. They can also get you in touch with other parents.

### Set a schedule

Even if you're following a lesson plan, it's good to brainstorm with your child about their day ahead.

Give them options. Give them time to adjust to the schedule.

### Involve the family

Homeschooling involves integrating your child's educational schedule with your family's regular routine.

Have a chat with your family and know what their expectations are with the home school setup—and what is expected of them.

### Create a space

A kitchen table or counter may have worked in the past. BUT now it's time to dedicate a space for them to work. It will get them focused and ready for the days lessons.

Create a space for art work and projects. Helping them and you appreciate the hard work achieved!

### Take breaks

It's simple advice - and you can't underestimate the power of breaks.

Add it to your schedule and make it fun—or be spontaneous and flexible and take it when you can.

### Be flexible

Learning from can be difficult, new, and frustrating.

Facilitate your child's study schedule closely, but be flexible to change it up based on your child's learning tendencies and emotional state at the time.

# DISTANCE EDUCATION

## PREK- 2ND GRADE

Below are a few sites for your children. Use them as an incentive when your child has completed their required school work!
